#### Andrew Wilson Partnership - 1 year 10 months

*Cadbury Chocolate Factory Refurb for ST Monica Trust*

We redeveloped 3 buildings and built a (180m long) Atrium and A-B link building

We developed Block A and B into 106 apartments (A), 30 apartments (B), 90 care beds, dementia ward, communal kitchen, swimming pool, spa, cinema, arts and crafts, woodwork, hairdressers, cafe, restaurant (A-B link), staff required rooms, 7 lifts, 2 atriums. Block C we developed into 2 basement carpark levels, Doctors Surgery, 5 levels of offices, new roof and top-level building, all required plant and core rooms, 4 internal lifts, one car park lift and 1 external platform lift

## **Responsibilities throughout this project.**

Originally I was brought onboard to assist the engineer. Giving me the opportunity to refresh my skills as an engineer.

Due to unforeseen leaving of the engineer, I stepped into the engineer role sooner than expected. Some of the items I became responsible for were the 2 story atrium, all external works, Podium waterproofing and drainage, internal soffit drainage to the basement and level 04 internal roof drainage, completion and handover or all lifts, Block C new foyer steel erection and facade construction.

Block A assistant manager - As the engineering load reduced I was placed in block A to assist the block manager with snagging and de-snagging, acting as a finishing foreman while continuing to complete external works.

Block C assistant manager - As Block A handed over I moved to Block C to take on the upper and lower basement along with assisting the block manager with the upper floors and the Doctors surgery. I continued in Block C for the Doctors handover, Levels 04 and 05 handovers to IVC, Levels 03 handover to Pukka Herbs and recently the hand over to AlderKing (St Monica Trust agent) who now have taken ownership of the building.

---

## **Training/Education**

- **Build Safety Group / SMSTS - 5 Day**
  - Site Manager Safety Training Scheme
- **3 Day First Aid trained**
- **Working at height trained**
- **Bristol City College / HNC construction management**
